## SUMMARY

Computer Science undergraduate (5th semester - CEUB), focused on full-stack web development. I seek opportunities to apply my skills and contribute to impactful projects, always aiming to learn new tools and optimize processes.

## PROJECTS

### Portfolio Website

- Personal website showcasing my background, projects, and skills.
- Features: light/dark theme toggle, language switch (Portuguese/English), responsive design, modern layout.
- Technologies: React, Material UI.

### Recipe Manager

- Web application for managing recipes and pantry inventory.
- Features: user registration and login, database integration, Gemini API integration.
- Technologies: Python, Django, HTML, CSS, JavaScript.

### Client Manager

- Web application designed to manage company clients.
- Features: user authentication, PostgreSQL database connection.
- Technologies: React, Supabase.
